Future of Contraception: What's in the Pipeline?

Presented by the Clinical Training Center for Family Planning
and University of Missouri-Kansas City School of Nursing and Health Studies

Description:

This webinar will feature a panel of experts discussing the preclinical and clinical developments of both male and female birth control...contraceptive methods that are not generally available to the public yet.

Objectives:

After this webinar, participants will be able to:

- Discuss reasons why new methods are needed.
- Describe contraceptive methods 'outside the box', getting closer to approval or just approved.
- Review the current state of research in male methods.
- Summarize that the male reproductive system has more non-hormonal contraceptive targets than the female reproductive system,
- Defend target validation,
- Describe potential on-demand male contraceptives under development,
- Discuss novel vaginal rings under development,
- Explain how male targets can be used for the development of female contraceptives,
- Define multi-purpose prevention technologies.

Successful Completion:

This webinar offers 1.0 contact hours for nurses. To receive contact hours, participants must complete the Evaluation and Request for Credit Form. For the recorded version, participants must complete the course with a satisfactory grade of 80% or higher on the quiz and complete the Evaluation and Request for Credit Form. CNE and CME certificates as well as Certificates of Attendance will be emailed within three to four weeks.
