

Providing Care in the 4th Trimester

Provided by the University of Missouri-Kansas City School of Nursing and Health Studies
Jointly provided by the Clinical Training Center for Family Planning

Description:

This is a webinar (Virtual Coffee Break) on the importance of providing family planning and associated care for postpartum women, including a review of all components of post-partum visits and guidance on providing care for women with common co-morbidities, such as diabetes or renal disease.

Objectives:

1. Explain that the optimization of postpartum care is not tied to a single postpartum visit/encounter but should become ongoing care, as needed
2. Describe the postpartum visit to include a full assessment of physical, social, and psychosocial well-being
3. Develop a plan of care for women with chronic medical conditions such as hypertensive disorders, obesity, diabetes, thyroid disorders, renal disease, and mood disorders

Successful Completion:

This course offers 0.5 contact hours. To receive contact hours, participants must complete the course with a satisfactory grade of 80% or higher on the quiz and complete the Evaluation/Request for Credit form. CNE and certificates of completion will be available immediately upon passing the course and submitting the evaluation.
