Screening Patients for Human Trafficking in the Health Care Setting

Provided by the University of Missouri-Kansas City School of Nursing and Health Studies
Co-provided by the Clinical Training Center for Family Planning

Description:

A one-hour webinar with Pam Glenn, CNM, discussing the issue of human trafficking, the signs that a patient may be in a trafficking situation, and steps clinicians can take to implement human trafficking screening in their own practices..

Objectives:

After this webinar, participants will be able to:

- Identify the most common forms of marijuana that adolescents are using
- List at least three strategies used by traffickers to recruit and control their victims.
- Describe at least three physical and three psychological signs of human trafficking.
- List at least three “red flags” alerting them that a patient may be in a trafficking situation.
- Articulate at least three appropriate screening questions.
- Identify at least three concrete steps they can take to implement screening protocols in their work setting, emphasizing the collaboration required with other professionals involved in this issue.

Successful Completion:

This webinar offers 1.0 contact hours for nurses. To receive contact hours, participants must complete the course with a satisfactory grade of 80% or higher on the quiz and complete the Evaluation and Request for Credit Form. CNE, CME and CHES certificates as well as Certificates of Attendance will be emailed within three to four weeks.
