Client Centered Care: Shared Decision Making in Family Planning

Provided by the University of Missouri-Kansas City School of Nursing and Health Studies

Jointly Provided by Right Time Initiative

Description:

The goal of this learning activity is to prepare health care providers to engage with family planning clients about their reproductive and contraceptive preferences, applying best practices in evidenced-based client-centered care.

Objectives:

After this course, participants will be able to:

- Identify three ways that bias could manifest itself during a contraceptive visit.
- Explain the benefit of practicing Cultural Humility as it relates to client-centered care.
- Describe three useful communication techniques when taking a client-centered care approach.
- Define five principles that ensure a client-centered care approach is taken.
- Apply cultural awareness, effective communication techniques, and the 5 Principles of client-centered care to family planning counseling.

Successful Completion:

To receive contact hours, participants must complete the quiz with a satisfactory grade of 80% or higher and complete the online Evaluation and Request for Credit Form. CNE, CME and CPH Certificates and Certificates of Attendance will be available immediately upon passing the course and submitting the evaluation. CHES certificates will be emailed within 4 weeks of submitting the evaluation.

Commercial Support/ Sponsorship:

No commercial support or sponsorship for this course.
