

# **CE Disclosure**

### Articles of Interest: HPV Boys and Men

Provided by the University of Missouri-Kansas City School of Nursing and Health Studies Jointly-Provided by the Clinical Training Center for Family Planning

### Overview

The NCTCFP presents a new Continuing Education modality, "**Articles of Interest**," featuring journal articles to keep you informed of family planning and reproductive health topics. This new on-line resource provides an easy way to obtain CE credit at your convenience! Just read the articles and complete a quiz about the content.

This 1.0 hour Articles of Interest activity is part of the upcoming Clinician Cafe on HPV vaccines and virus prevalence in men and boys in the USA.

#### **Successful Completion**

This course offers 1.0 contact hours. To receive contact hours, participants must complete the course with a satisfactory grade of 80% or higher on the quiz and complete the Evaluation/Request for Credit form. CNE and CPH Certificates as well as Certificates of Completion will be available immediately upon passing the course and submitting the evaluation.

### Objectives

- Identify disparities in rates of HPV among US male populations
- Describe at least three factors that are positively associated with initiation and completion of the HPV vaccination series in adolescent boys
- Describe at least three factors that are positively associated with initiation and completion of the HPV vaccination series in adult men Articles used: Henry, K. A., Swiecki-Sikora, A. L., Stroup, A. M., Warner, E. L., & Kepka, D. (2018). Area-based socioeconomic factors and Human Papillomavirus (HPV) vaccination among teen boys in the United States. BMC public health, 18, 1-16. Guo, Y., & Bowling, J. (2020). Human papillomavirus (HPV) vaccination initiation and completion among adult males in the United States. The Journal of the American Board of Family Medicine, 33(4), 592-599. Loretan, C., Chamberlain, A. T., Sanchez, T., Zlotorzynska, M., & Jones, J. (2019). Trends and characteristics associated with HPV vaccination uptake among men who have sex with men in the United States, 2014–2017. Sexually transmitted diseases, 46(7), 465
